Highlights

V-Track Precision Blades

The patented V-Track Precision Blades gently position each hair in the best cutting angle, even hairs that are flat or different lengths. This allows you to cut 30% closer in less strokes leaving your skin in great condition.

Super Lift & Cut Action

The dual blade system built into the Philips electric shaver lifts hairs to cut comfortably below skin level for a closer shave.

Replacement reminder

The latest Philips shavers have an inbuilt replacement reminder in the form of a shaving unit symbol. This

symbol will light up and indicate you when to replace shaving heads.

Simple replacement

1. Pull the shaving head holder off. 2. Place the retaining ring holder on the retaining ring, turn it anti-clockwise and lift it off the shaving head. 3. Replace the shavings heads with new ones. 4. Place the retaining ring on the shaving head using the holder and turn it clockwise to reattach. 5. Reattach the shaving head holder. 6. To reset the shaver, press and hold the on/off button for more than 5 seconds.

Reset your shaver

After replacing shaving heads, you can reset the replacement reminder by pressing the on/off button for more than 7 seconds. Otherwise, replacement trigger will turn off automatically after 9 successive shaves.
